Boosting Liners Over the Continental

Think of a huge bath-tub-

One-fifth of a mile long, as high as a 6-story house, with walls 45 feet thick at the floor-

And you will have some idea of the size of the six giant locks in your Panama Canal.

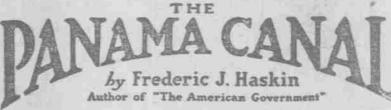

Do you realize there is enough concrete in these locks to build houses for as many people as live in Indianapolis? At the ends of these concrete basins are iron gates. And they are gates with a ven-

geance! Think of masses of steel 83 feet high, 65 feet wide and a matter of 7 feet thick-with hinges tipping the scales to 70,000 lbs. for the

As easily as your boy takes his toy boat out of the bath-tub will ocean steamers be lifted out of the Atlantic Ocean and carefully set down in the

We live in the day of big things, but your Panama Canal from start to finish is the most colossal single thing the hand of man has done.

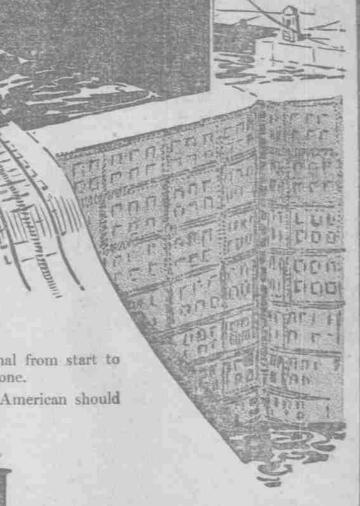

Every man and woman in the land who is proud to be an American should read this timely American book:

As you turn the pages of this absorbing book you will learn about the locks and their mechanism, the tremendous Culebra Cut and the giant Gatun Dam. You will read of the wonderful care our Government has taken of the 50,000 men who did the work, and of the same wonderful care it will take of the small army of employees who will stay on the Isthmus to put the ships through.

You will read of the provisions for the comfort of globe trotters who will be journeying to this eighth wonder of the world.
